Parmar Krunalsinh
Krunalsinh27
parmarkrunalsinh37@gmail.com

PROFILE

Computer Engineering undergraduate with strong interest in software development and web technologies. Experienced in building responsive web applications using HTML, CSS, JavaScript, PHP, and MySQL. Skilled in problem solving and Data Structures using C++. Seeking opportunities to apply technical skills and contribute to real-world software projects.

EDUCATION

BE/B.TECH IN COMPUTER ENGINEERING
LDRP Institute of Technology and Research/KSV University
2023 – Present

SKILLS

Programming Languages
- C++
- Python
- Core Java

Web Technologies
- HTML
- CSS
- JAVASCRIPT
- ReactJS

Backend
- PHP
- NodeJS

Database
- MySQL

Core Concepts
- DSA With C++
- Object-Oriented Programming

DEVELOPER TOOLS

- Git & GitHub
- VS Code
- IntelliJ IDEA
- Bootstrap

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Communication

PROJECTS

GEMINI AI CHATBOT WEB APPLICATION | (HTML, CSS, JAVASCRIPT)

• Developed an interactive AI chatbot interface inspired by Google Gemini using HTML, CSS, and JavaScript.
• Integrated Open-Router API to generate AI-powered responses and simulate real-time conversational interactions.
• Implemented chat history management using browser localStorage for persistent conversation storage.
• Designed responsive user interface with dark/light theme toggle and modern chat layout.
• Added features like file upload support, chat export, and message typing animation for improved user experience.

SNAKE GAME | (HTML, CSS, JAVASCRIPT)

• Built an interactive Snake Game with dynamic movement and collision detection.
• Implemented score tracking and high-score storage using localStorage.
• Added pause/resume controls, timer functionality, and increasing game speed.
• Designed responsive UI with light/dark theme toggle.

PERSONAL EXPENSE TRACKER | (HTML, CSS, JAVASCRIPT)

• Designed and developed a financial management web application that allows users to track income, expenses, and spending limits.
• Implemented transaction management features including add, edit, delete, and search with dynamic UI updates.
• Integrated localStorage for persistent data storage and implemented CSV export and report printing functionality.
• Built interactive dashboard with charts, expense categories, and real-time financial summary.

TO-DO LIST WEB APPLICATION | (REACTJS)

• Developed a task management application using react with component-based architecture.
• implemented CRUD operations for tasks including creation, update, deletion, and completion status.
• used React Hooks for efficient state management and real-time UI updates.
• integrated Localstorage for persistent task storage and improved user experience.
